2025 - pursuing

PROFILE

Motivated and enthusiastic Full Stack Developer with a strong foundation in Python, Django, React, HTML, CSS, and JavaScript. Passionate about building responsive web applications and continuously learning new technologies. Seeking an opportunity to grow as a software developer and contribute to real-world projects.

PROJECTS

Student Management System

- Technologies: Python, Django, SQLite/MySQL, HTML, CSS, JavaScript, Tailwind CSS
- A web application designed to manage student records digitally.
- Allows administrators to add, update, delete, and view student information.
- Includes search and filter functionality for quick access to records.
- Features a responsive dashboard to display student data and activities.
- Built using Django ORM for efficient database management.
- GitHub: <https://github.com/Nitin0259/Student-Management-System>

Agency AI Website

- A modern AI agency landing page designed to showcase AI services and solutions.
- Built using React.js with reusable and modular components.
- Designed a fully responsive user interface using Tailwind CSS.
- Implemented smooth scrolling, interactive sections, and modern UI elements.
- Optimized for fast performance and compatibility across different devices and browsers.
- GitHub: <https://github.com/Nitin0259/Agency-AI-Project>

Travel Booking Website

- A responsive travel booking website that helps users explore travel destinations and tour packages.
- Developed an attractive homepage with featured destinations, travel packages, and booking sections.
- Implemented interactive navigation, image sliders, and responsive layouts using JavaScript and CSS.
- Optimized the website for desktop, tablet, and mobile devices.
- Focused on delivering a clean, user-friendly, and engaging browsing experience.
- GitHub: <https://github.com/Nitin0259/Travel-Booking-website>
